

Cufflinks

Cufflinks

Despite the appearance of the mass-produced sleeve with attached buttons in the 1970's, today the cufflink continues to be the ultimate fashion accessory for discerning men - and women! It gives the wearer the opportunity to show something of their personality, indicate family lineage or status, make reference to a hobby or interest or simply make a fashion statement.

The Rebus Classic range of cufflinks have been designed to complement our signet rings. Each pair is handmade, individually polished, ensuring beautiful crisp shaped blanks, a perfect canvas for engraving your initials and crest onto. The Classic range are supplied in silver, 9ct and 18ct yellow and white gold. All cufflinks are sold beautifully presented in their own boxes.

Engraving

Designing your initials into a cypher or monogram is all part of our engraving service, we have suggested four styles for you too choose from. However we are able to engrave any artwork, good or bad supplied. Seal engraving is also possible on all our cufflinks due to their substantial weight. With regard to our oval and rectangle cufflinks, please state whether you would like them engraved portrait (upright) or landscape (length wise).

1. Double linked ovals & T Bars
